Description of Mechanical Work

Description of Plumbing Work

Pad-mounted equipment such as heat pumps or air conditioning units shall not be located in any front yard setback area; shall be located at least five feet from any adjacent property line or structure, including fences; and shall be screened from view of any public right-of-way by means of either landscaping or fencing. Any such screening should be installed such that it can either be readily removed to provide access to said equipment, or should be placed at least three feet from said equipment to allow for access.
